Introduction

I pursued my academic journey at FPT University, where I specialized in Software Engineering. During my time at FPT, I acquired a solid foundation in various aspects of software development, with a particular focus on utilizing C# and Java programming language. My coursework emphasized practical skills, and I honed my abilities by actively participating in the creation of web applications including Razor Pages, MVC Model and developing Web APIs, etc.
I am confident that my education at FPT University, combined with hands-on experience, positions me as a qualified candidate ready to excel in challenging roles within the field of software engineering.

Projects

Project name: Document Management System (DMS)
Time: 02- 2022- 07- 2022
Project introduce:
- Summary: Develop an application for Viet Jet Air to manage their document in folders based on Google Drive.
- Technology: .NET 5, PostgreSQL, Microservices, N-Layers Architecture, xUnit, Moq, Postman, GitHub, Jira, Docker
- Team size: 4
- Role: Back-end developer
- Responsibilities:
  - Testing, Develop APIs, SOLID principle
- Github: https://github.com/minhkhoabt8/DMS

Project name: Library Management System (LMS)
Time:10- 2021- 2- 2022
Project introduce:
- Summary: Develop an application for Viet Jet to manage their library(books, tags, ISBN,...) including student borrowing and returning book for both online and offline.
- Technology: .NET 5, Microservices, N-Layers Architecture, xUnit, Moq, Postman, JMeter, GitHub, Jira
- Team size: 5
- Role: Back-end developer, Tester
- Responsibilities:
  - Testing, Maintain APIs, Develop Web APIs, SOLID principle

Project name: Binh Dinh Site Clearance Project
Time: 11- 2019- 12- 2023
Project introduce:
- Summary: Develop a web API used to support Binh Dinh Province to site clearance by managing projects, plans and its document.
- Technology: .NET 6, MS SQL Server, Microservice, N-Layers Architecture, xUnit, Moq, Postman, GitHub, Window Server 2016, Email SMTP, Phone OTP, Docker
- Team size: 4
- Role: Back-end leader
- Responsibilities:
  - Database Design, Set-up Back-end Environment, Testing and writing code for back-end APIs, CI/CD,
- Github:https://github.com/minhkhoabt8/YOLO

Project name: Bookington-API
Time:11- 2019- 12- 2023
Project introduce:
- Summary: Develop a web API used to manage badminton's slots for customers to check in include payment services.
- Technology: .NET 5, MS SQL Server, Momo Payment APIs, N-Layers Architecture, xUnit, Moq, Postman, GitHub, Azure, Jira, Email SMTP, Phone OTP
- Team size: 4
- Role: Team leader
- Responsibilities:
  - Database Design, Set-up Back-end Environment, Testing, Develop Web APIs, CI/CD, Project Management
- GitHub:https://github.com/minhkhoabt8/Bookington-API
